

# The Fool-Proof Method

What do you do?

Explain how you do it

Example: Over the past 5 years I have lead a project to test the quality of drinking water. We have successfully tested the water in 15 counties and increased access to clean drinking water for over 3,000 individuals.

Introduce yourself

Example: I'm Cassie Lee, director of the environmental health department at Metropolis Health.

Why does your work matter?

Example: My work as an environmental health professional is important because I protect our community from disease and hazardous environmental conditions.

Call to action

Example: As our city grows, the strategies to maintain a safe environment change as well. I am asking you to fund Metropolis Health's environmental health department to protect our community and keep our environment safe.
