

Find Your Community With the Private Water Network

The Private Water Network (PWN) is a free, virtual community of practice for anyone working to protect communities from contaminants in private drinking water sources. Through a virtual, easy-to-use platform, PWN provides a place to exchange ideas and

solutions with professionals working on similar issues and facing similar barriers. The goal is to build a sustainable community for those working to support private water programs to connect with their peers and share experiences, insights, and resources to ultimately build capacity to protect private water quality.

The virtual community platform includes a discussion forum, comprehensive resource library, educational events and webinars on private water issues, newsletters focused on private water issues, and member directory with a community-wide search option. We hope to expand membership to include individuals from every state and territory in the country. We are particularly interested in new members working at state, tribal, local, and territorial governmental public health agencies, federal agencies, national associations, certified laboratories, and academic and extension partners.

Membership to PWN is free. While NEHA membership is not required

The Food Inspection Set, Veterinary was issued to members of the U.S. Army Veterinary Corps who were charged with ensuring food safety. The set contained the essential tools to examine packaged foods upon delivery such as a hammer and pry bar, tin snips, awl, two bimetal thermometers, and a pocket ruler. The tools in the set allowed the veterinarian in charge of food safety to inspect food for freshness, temperature, quality, and sanitation before accepting food deliveries. This set dates from the Vietnam War era.
