

The National Environmental Health Association (NEHA) represents more than 7,000 governmental, private, academic, and uniformed services sector environmental health professionals in the U.S., its territories, and internationally. NEHA is the profession's strongest advocate for excellence in the practice of environmental health as it delivers on its mission to build, sustain, and empower an effective environmental health workforce.

**Policy Statement on Food Safety as Related to the Consumption of Cannabis Alkyl Derivatives** are a controlled substance and should be handled in foods in a manner similar to pharmaceutical production, including concentration, labeling, and homogeneity of the substance throughout the product.

x The production, processing, packaging,

## Justification

The legalization of cannabis and the availability of CIFPs are potentially related to spikes in calls to poison control
